

Flask Deployment

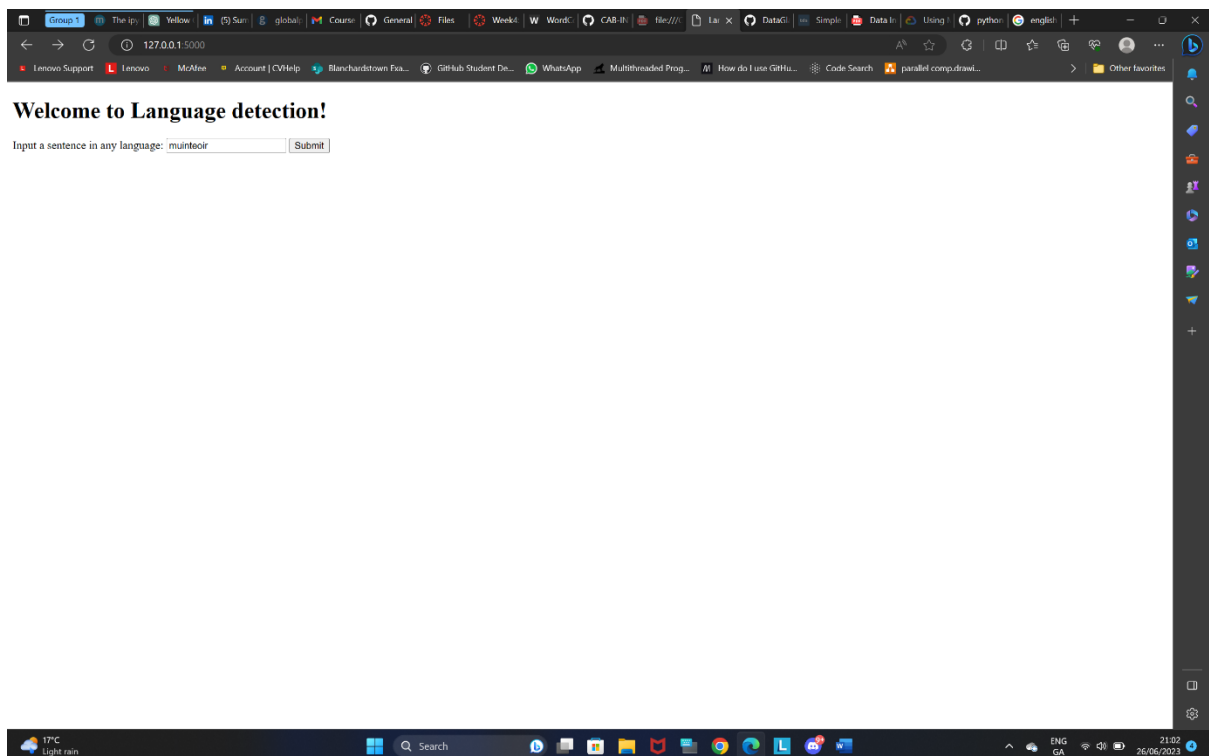

Name: Jesse Osuji

Internship Batch: LISUM22

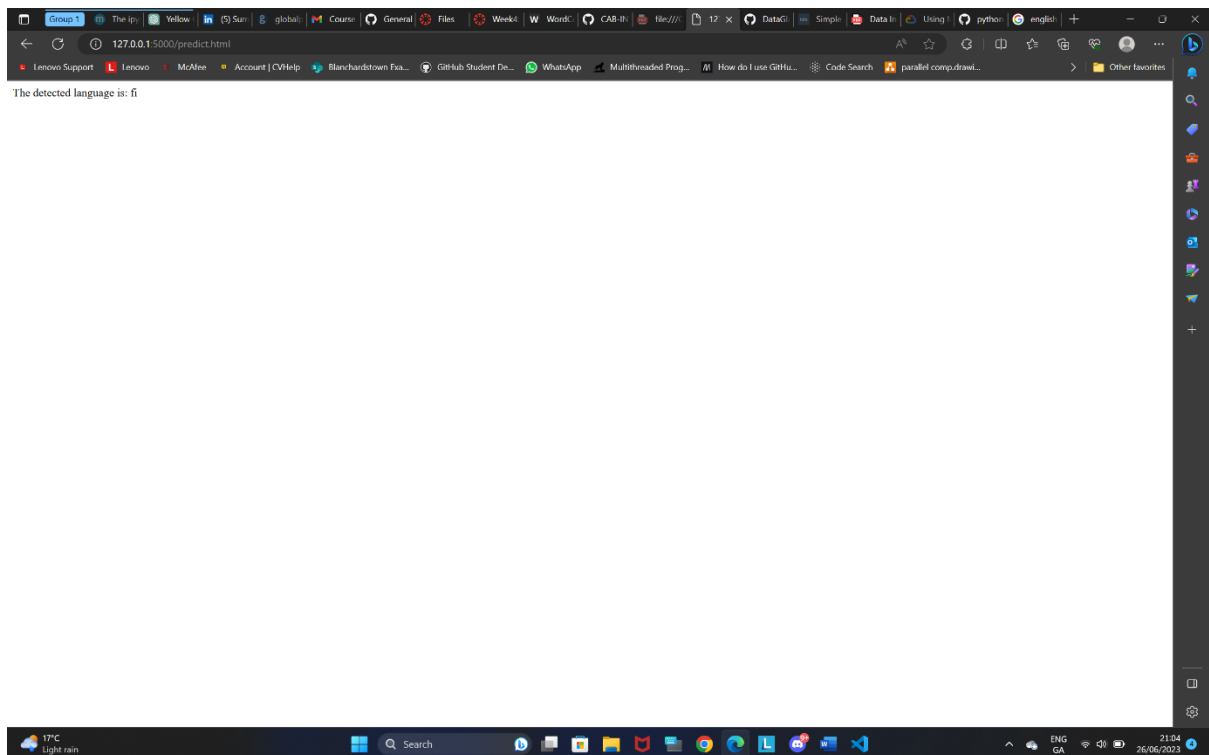

Submission date: 26th of June 2023

Submitted to: [TUJesse/Flask: Flask deployment \(github.com\)](https://github.com/TUJesse/Flask: Flask deployment)

There is a page that allows a user to input text in any language.

When the submit button is pressed the detected language is displayed to the user.

The data model used is langdetect which detects the language passed into the function detect().
